

Simple but clever, each game becomes more fun and challenging than the last.

The new Gigamic abstract game we have all been waiting for !

Be the first to cross the board and come back with 4 of your 5 pawns. The pawns move according to the strength indicated on their starting spots. Once they reach the end of the board, they turn around and come back home at a different pace. If your pawn passes over an opponent's, the opponent's pawn returns to its starting point. Careful planning and anticipation are key in order to win a game of Squadro.

CONTENTS:
